Good but with Significant Gaps

By Jason Wisniewski

Jerry L. Campbell's "FW 190 in Action" has strong coverage of the BMW 801-powered Fw 190A, F, and G models but oddly does not cover the DB 603-powered B and C, Jumo 213-powered D, or Ta 152 models. For those models covered, there is a strong attention to detail with emphasis on the A-1 through A-8 models, including technical differences and brief operational history. The book is loaded with photographs, two three-view line drawings, a page of color paintings, and illustrations. Strangely, technical specifications are lacking as dimensions and weights are listed but performance data is completely absent. Overall, this is not a bad source for info on early versions of one of the Luftwaffe's top fighters but for the complete story one must look elsewhere.
