A simply written book, yet it is a profound work

By Jody Risacher

This is an accessible title with a straightforward approach. It describes how we can function on this earth to bring about health and well-being for the planet and for its inhabitants. It describes a partnership with Spirit through an acknowledged relationship with "celestials", evolved beings who wish to offer guidance, love and wisdom to a forlorn, floundering world. It's another sign of a global awakening, to me, and I see its value and place. I recall hearing Eckhart Tolle describe how a reviewer from a national magazine could not make sense of his Power of Now. There will no doubt be some who feel the same way about this book. It will find its readership, though. I yearn for a day of true dialogue with other people in the service of re-building our institutions and working towards solution.

Great concepts to ponder. I also highly recommend a study of the great Urantia Book if one is truly interested in expanding and enhancing their philosophical, cosmic, and theologic frameworks of universe and human knowledge as well as youtube post related to the Urantia Book and the programs presented with Byron Belitsos.
