superb

By mohammed marae asieri

The manual ,in roughly 400 pages, presents trauma in a very practical way. Each chapter starts with introduction followed by operative tips .Chapters on Lung injury Trachea/Bronchus& Esophagus are particularly unique with clear pictures and diagrams. What make the book more attractive is the clear description of techniques and different algorithms / options facing the trauma surgeon.I liked in particular the detailed discussion in Liver injury and chapters on Trauma Endovascular Management as well as Timing of Ortho interventions/principles of Damage Control Ortho.As a trauma fellow, I found the manual very useful during my daily calls especially the time between operations.
